2 Years of Getting Shit Done at bunq

Peter van Doorn

Culture @ bunq | Product owner and Python Developer
Utrecht, Utrecht, Nederland

Samenvatting

♂# Product owner at various start and scale ups. (Including bunq, Cybersprint and Friss)

Python Software engineer at various open source projects (Check my Github)

Getting shit done (Data > Gut feeling, not boring meetings. Decision and outcome is what counts)

I'm not hiring any staff, or looking for any products. No acquisition through LinkedIn please. If I need anything: I can use Google.

Ervaring

bunq

Cultural Evangelist and Company Confidant

juni 2022 - Present (1 jaar 5 maanden)

Amsterdam, Noord-Holland, Nederland

"If you think something is impossible you're knocking on the wrong door" - it's the attitude with which bunq was built. As the cultural evangelist I help employees to work with that mindset. Trying to empower them to maximises success. I train individuals and teams to have the user front and center, take ownership, learn from mistakes, turn data into triumphs and help prioritising action over excuses.

Besides that I'm the go-to guy for planning celebrations and parties year-round and across the globe and the person to speak as the company confidant

Peter van Doorn

Python Developer // Product Owner

januari 2017 - Present (6 jaar 10 maanden)

Utrecht, Nederland

Web developer and Product owner. Skilled in Python, Django Framework, AWS, and Docker. Passionate about coding and creating things. Proven track

record of delivering projects on time and within budget. Contact me to discuss your project needs.

FRISS

Product Owner

augustus 2021 - juni 2022 (11 maanden)

Utrecht, Nederland

At Friss I assembled a brand new UX team tasked to overhaul and unify the Friss Fraud detection platform. We set up a brand new style guide in storybook and implemented that design component based in Vue.js. Sprint by sprint we delivered prototypes and features.

Cybersprint

Product Owner

augustus 2020 - augustus 2021 (1 jaar 1 maand)

Den Haag, Zuid-Holland, Nederland

At Cybersprint I guided the redesign and implementation of a brand new user interface for the Cybersecurity platform. Using Vue.js and Django we overhauled the interface to better fit users needs.

While rebuilding the platform I helped the team implement proper Scrum and Agile methodology, increasing the velocity by as much as 30%.

bunq

3 jaar

Product Owner // Business continuity officer

mei 2019 - juni 2020 (1 jaar 2 maanden)

Amsterdam en omgeving, Nederland

As a seasoned product owner in the fintech industry, I bring a unique blend of financial and technical expertise to the table. My strategic thinking and customer-centric approach allows me to design products that solve problems, meet customer needs and achieve business goals.

Optimizing and automating, CDD and KYC

juli 2017 - mei 2019 (1 jaar 11 maanden)

Amsterdam en omgeving, Nederland

Design and implementation of automated CDD and KYC checks. Making sure we can automatically onboard new users in less than 5 minutes.
